NEB 800 S-V1-1219

## 2. Preparation before Use

Inserting the batteries (3) After you have unpacked your device, first insert the batteries. The battery compartment (3) is on the bottom of the device. Insert the batteries (2 x 1.5 V, size AA), thereby observing the indicated polarity.

Using a Mains Adapter You can operate this device using the MicroLife mains adapter (DC 3V, 1.33A).

Plug the adapter plug into the wall socket. Press the ON/OFF button (4) and check if the indicator light (4) lights up green.

Orange light: batteries are weak. Red light: batteries are exhausted and need replacing. Red light flashes 3 times: device turns off automatically, as no medicine is inside.

## 3. Using the Device for the First Time

Prior to using the device for the first time, we recommend cleaning it as described in the section 'Cleaning and Disinfecting'.

Snapping the nebuliser lock (1) upwards to open the nebulising head (3). Fill the medication as per your doctor's instructions into the drug storage area (4). Ensure that you do not exceed the maximum level.

Press the nebuliser lock (1) downwards; a click sound indicates that the nebuliser cover (1) is closed correctly.

Connect the mouthpiece or a face mask as shown in picture (5) and (6). The mouthpiece gives you a better drug delivery to the lungs.

Start the nebulisation by pressing the ON/OFF button (4) and the indicator light (4) will light up green.

Breathe in and out calmly during the therapy. Sit in a relaxed position with the upper body upright. Do not lie down while inhaling. Stop inhalation if you feel uncomfortable.

Remove the mouthpiece (5) or face mask (6) and disconnect the nebuliser from the power source. Clean the nebuliser and its accessories as described in the section 'Cleaning and Disinfecting'.

When the liquid is getting low, you may tilt the device a little towards yourself in order to make full use of the residual liquid.

The maximum tilting angle of the device is 45° while nebulising.

Dear Customer, This mesh nebuliser is prescribed for inhalation therapy for asthma, chronic bronchitis, and other respiratory illnesses. If you have any questions, problems or want to order spare parts please contact your local MicroLife Customer Service. Your dealer or pharmacy will be able to give you the address of the MicroLife dealer in your country. Alternatively, visit the internet at www.microlife.com where you will find a wealth of invaluable information on our products. Return instructions in a safe place for future reference. Stay healthy - MicroLife AG!

Read the instructions carefully before using this device. Type BF applied part. Important Safety Instructions. Follow instructions for use. This document provides important product operation and safety information regarding this device. Please read the document thoroughly before using the device and keep for future reference. This device may only be used for the purpose described in these instructions. The manufacturer cannot be held liable for damage caused by incorrect application.

Do not touch the metal mesh in the nebulising head with your hands or foreign objects. This device should only be used with original accessories as shown in these instructions. This device comprises several components and must be treated with caution. Observe the storage and operating conditions described in the 'Technical specifications' section.

Only use the medication prescribed for you by your doctor and follow your doctor's instructions with regard to dosage, duration and frequency of the therapy. The liquid for nebulisation should be prepared based on 0.9% saline or whatever advised by your doctor. No tap or boiled water can be used. The container used for the preparation of liquid must be sterilized. Never use liquids which contain ester, fatty or suspended particles (including diffusion juices or herbs); specifications may vary with the medication type used. If the device is not going to be used for a prolonged period the batteries should be removed.

Do not use this device if you think it is damaged or nothing anything unusual. Never open this device. Protect it from: water and moisture, extreme temperatures, direct sunlight, impact and dropping, contamination and dust, direct sunlight, heat and cold, flammable gas, heating units and open fire, corrosive acids.

To avoid any risk of electric shock when using this device please observe the following: Never use the device in a humid environment such as a bathroom when the power cord or the main unit has gotten to be used. Never plug in or unplug the adapter cable with wet hands. Check that the supply voltage at the power socket is correct, as not to damage the device. Unplug the device from the power supply before cleaning.

Do not use this device close to strong electromagnetic fields such as mobile telephones or radio installations. Keep a minimum distance of 3.3 m from such devices when using this device. Check that children do not use this device without supervision; some parts are small enough to be swallowed. Be aware of the risk of strangulation in case this device is supplied with cables or tubes.

Use of this device is not intended as a substitute for a consultation with your doctor.

2. Préparation avant utilisation Insertion des piles (3) Après avoir déballé votre appareil, insérez d'abord les piles. Le compartiment à piles (3) se trouve sur le fond de l'appareil. Insérez les piles (2 x 1,5 V, format AA) en respectant les indications de polarité.

Utilisation d'un adaptateur secteur Vous pouvez faire fonctionner votre appareil à l'aide d'un adaptateur secteur MicroLife (DC 3V, 1,33A).

Plug the adapter plug into the mains adapter socket (8) in the main unit (3). Plug the adapter plug into the wall socket.

Press the ON/OFF button (4) and check if the indicator light (4) lights up green. Orange light: batteries are weak. Red light: batteries are exhausted and need replacing. Red light flashes 3 times: device turns off automatically, as no medicine is inside.

3. Utilisation de l'appareil pour la première fois Avant d'utiliser l'appareil pour la première fois, nous recommandons de le nettoyer et de le désinfecter comme décrit dans la section 'Nettoyage et désinfection'.

Presser le verrou du nébuliseur (1) vers le haut pour ouvrir la tête du nébuliseur (3). Remplir la tête du nébuliseur avec le médicament avec de l'eau chaude du robinet (70 °C max.). Fermer la tête du nébuliseur et agiter pendant 30 secondes.

Brancher le connecteur de l'adaptateur secteur sur la prise de courant murale.

Brancher le masque (16) ou le masque facial (11) sur la tête du nébuliseur.

Appuyer sur le bouton ON/OFF (4) et vérifier que l'indicateur lumineux (4) s'allume en vert.

La lumière orange: les piles sont faibles et doivent être remplacées. La lumière rouge: les piles sont épuisées et doivent être remplacées. La lumière rouge clignote 3 fois: l'appareil s'éteint automatiquement, car aucun médicament n'est à l'intérieur.

3. Première mise en service de l'appareil Nous vous recommandons de nettoyer avant la première utilisation tous les éléments conformément aux instructions décrites dans la section 'Nettoyage et désinfection'.

Presser le verrou du nébuliseur (1) vers le bas et le cliquer pour ouvrir la tête du nébuliseur (3). Remplir la tête du nébuliseur avec le médicament avec de l'eau chaude du robinet (70 °C max.). Fermer la tête du nébuliseur et agiter pendant 30 secondes.

Brancher le connecteur de l'adaptateur secteur sur la prise de courant murale.

Brancher le masque (16) ou le masque facial (11) sur la tête du nébuliseur.

Appuyer sur le bouton ON/OFF (4) et vérifier que l'indicateur lumineux (4) s'allume en vert.

La lumière orange: les piles sont faibles et doivent être remplacées. La lumière rouge: les piles sont épuisées et doivent être remplacées. La lumière rouge clignote 3 fois: l'appareil s'éteint automatiquement, car aucun médicament n'est à l'intérieur.

3. Utilisation de l'appareil pour la première fois Avant d'utiliser l'appareil pour la première fois, nous recommandons de le nettoyer et de le désinfecter comme décrit dans la section 'Nettoyage et désinfection'.
